

For docket #02-50, I am sending my comments because I am opposed to the XO Communication's management team's handling of their shareholders. By an inside deal/sale of the company to an investment group, they were able to completely eliminate shareholder wealth, and at the same time give themselves a larger percentage of ownership after this inside deal. Shareholders were completely neglected and had no warning. In fact, management through their previous quarterly report mentioned nothing of such dealings. The company should have required a vote of shareholders before selling them out. If situations like this continue, individual investors will completely lose confidence in the equity system. As a shareholder, I feel the company should have been required to liquidate their assets so that at least we would receive something. Thank you for considering my comments!
